

Prime & Dry Offset

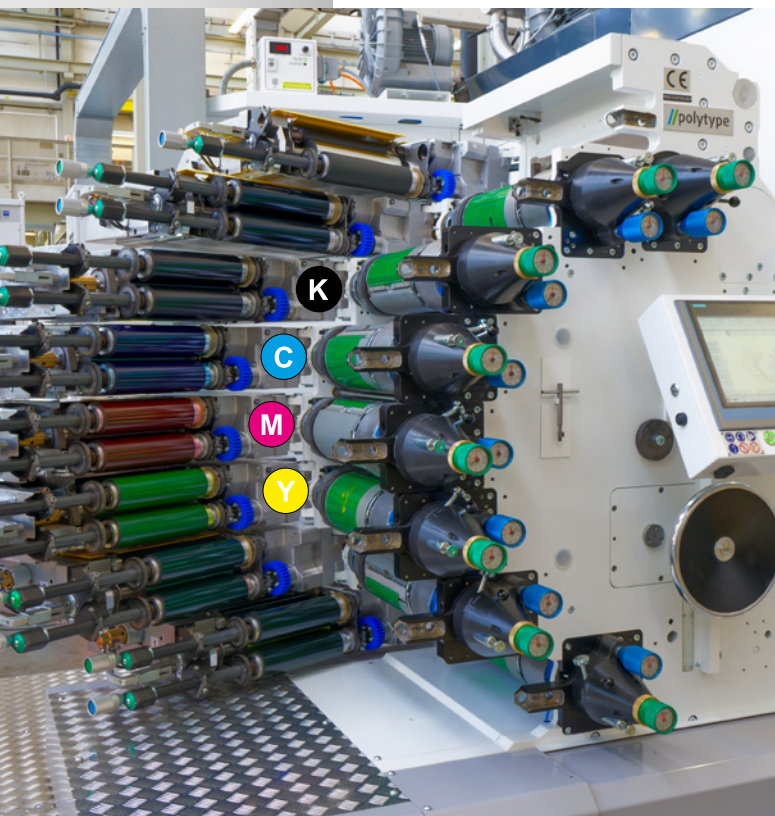

Design Change

M91-Hybrid printing unit for
Prime Offset & Dry Offset on the
RDA printing machines

//polytype printing unit M91-Hybrid: For existing and photorealistic designs

- // Photorealistic printing using CMYK
- // High-speed printing with consistent high print quality
- // Fast design changeover
- // Colour graduation down to 0 % in all directions

The M91-Hybrid printing unit enables 3 modes in offset printing

- // Prime offset with waterless offset printing plates and optimized four-colour printing (CMYK) with short inking units
- // High definition offset with waterless offset printing plates and color separation (Pantone colors)
- // Standard dry offset with nylon printing plates and color separation (Pantone colors)

Specification of M91-Hybrid printing unit

- // Colours: Up to 8 inking units
- // Standard inking units: Independently selectable
- // Short inking units: Independently selectable
- // Temperature controlled: Inking units & printing plate cylinders
- // Maximum printing length: up to 215 mm
- // Printing speed: up to 240/min
